PLATE A: The human heart is a remarkable muscle. If it “beats” an average of 80 times per minute, then each day it beats 115,200 times. The workload is non-stop, yet if you are overweight or obese, an estimated 23% of coronary artery disease can be blamed on the excess pounds you are carrying. **PLATE B:** Joint problems — including hip, knee and ankle issues, plus osteoarthritis, can be directly linked to an overweight condition. This can lead to life-long pain.

Don't Gamble With Your Health...Restore It With The Weight-Reducing Miracle Of Kyto-Trim 3000!

If you are overweight or obese, you may decide to accept it and simply say, “I am comfortable and content in my body.” But the truth is, with an overweight condition — your body and your health are under constant stress and may be in imminent danger.

In 2014 — 39% of the world's population aged 18 or older were overweight. 13% were obese. The World Health Organization defines “overweight” as having a BMI (Body Mass Index) of over 25. With a raised BMI, diseases flourish, specifically:

- Cardiovascular diseases (primarily heart attack and stroke), which were the leading cause of death in 2012
- Diabetes
- Musculoskeletal disorders, particularly osteoarthritis, which is an extremely disabling degenerative disease of the joints

Nature's Medicines Combined Into One Elite Super-Tablet . . .

Garcinia Cambogia (pictured below) is a tropical fruit which resembles a small pumpkin, and it grows on the *Malabar tamarind* tree, native to Indonesia — but also found in Asia, Africa and India. As with many fruits, it is the *rind* which contains the most important and essential health-yielding properties — and it is the ground *extract* powder of *Garcinia Cambogia*'s rind, specifically, the rind's active ingredient, hydroxycitric acid (HCA)...which amazingly, safely and *naturally* suppresses appetite and prevents fat from being made.

extract powder of *Garcinia Cambogia*'s rind, specifically, the rind's active ingredient, hydroxycitric acid (HCA)...which amazingly, safely and *naturally* suppresses appetite and prevents fat from being made.

The Active Ingredient “HCA” Blocks An Enzyme Called Citrate Lyase, Which Your Body Uses To Make Fat!

Hydroxycitric acid, HCA — successfully *inhibits* the action of the enzyme *citrate lyase*, and by doing so it prevents the conversion of carbohydrates into bodily fat. Thus, any *fat* consumed is quickly burned as energy, and unburned fat is harmlessly eliminated before it can be stored. Moreover, weight loss, particularly the *reduction* of belly fat, is triggered almost instantly, since the body's stored fat must be utilized to fuel needed energy.

Garcinia Cambogia Is One Of The Primary Components Kyto-Trim 3000 Formula. But There Is Much More . . .

Scientists who created the *Kyto-Trim 3000* formulation were singularly committed to combine, in one safe, drug-free *complex* — the most pow-

erful and efficient compound ever devised for fast-acting, significant weight reduction.

The ingredient-combination had to be effective for both women and men, incorporating a potent, stable and biologically thermogenic capability to burn and block fat, boost metabolism and suppress appetite so that weight loss could be achieved without rigorous dieting or health risks. Trial and error testing led the pharmaceutical research group to disqualify many substances altogether; others were eliminated due to inconclusive clinical data. The final customized formulation, which includes *chromium picolinate*, *white kidney bean extract*, *chitosan* and other potent fat-fighting nutrients, is now available for immediate direct purchase and represents an exciting new standard in weight loss and weight management.
