- If you enjoy smoking, Vapor Mate's™ revolutionary E-Cigarette will be the most satisfying TOBACCO-FREE cigarette you have ever experienced. It contains a Pure NICOTINE cartridge.
- If you are trying to curb or quit your habit, Vapor Mate™ will help you achieve your goal at your own pace — minus the more than 4,000 dangerous chemicals native to tobacco smoke.

Dear Smoker, perhaps today you stand at the crossroads of your smoking life. You enjoy the stimulation and “rush” of a good cigarette, the exhilarating smoker’s “high” and the social interaction of smoking — but at the same time, you know it comes with a heavy price.

Unfortunately, that price could be devastating. Statistics concerning tobacco and tobacco smoke are not promising. According to the World Health Organization, tobacco kills HALF of ALL lifetime users . . . and 50% of those individuals die between the ages of 35 and 69. No consumer product exists which is as dangerous, or as lethal. Tobacco kills more than AIDS, legal drugs, illegal drugs, road accidents, murder, and suicide combined.

Take another final look at the compelling photographs inside this brochure. They speak directly to the evils of tobacco. With a fifty percent kill-rate of ALL lifetime users (1 out of 2), the odds are frightening. Yet by *eliminating* tobacco, which is precisely what the Vapor Mate™ System does, you stop over 4,000 toxic chemicals from entering your body. That alone may be your ultimate salvation for a lifetime of health.

Most sincerely, 
Director

The Perils Of
TOBACCO
and why you should
stop now!

According to the World Health Organization, global mortality due to conventional smoking will exceed 9 MILLION ANNUAL DEATHS by the year 2020, with seven million deaths occurring in developing countries alone.

Inside this pamphlet are heartwrenching pictures of the ravages of tobacco, yet do not lose hope. With the revolutionary Vapor Mate™ System, you can still get the therapeutic boost and stimulation you desire from cigarettes, while eliminating over 4,000 dangerous chemicals and known carcinogens linked to traditional smoking!

Oral Cancer: Mouth, gum, jaw, tongue — severe and spreading! Oral cancers like this are highly attributable to tobacco smoking, which also causes bad breath, tooth loss and damage to the natural mucosa of the mouth.

Laryngeal Cancer: Secondary tumors already visible in the lower right hand section of the above photograph. Surgery and tracheotomy in place — a disfiguring result of lifelong tobacco smoking.

Stillborn Fetus: Tiny and premature, this blameless unborn child easily fits in a gloved hand. Smoking while pregnant accelerates the heartbeat of a fetus significantly. In this case, mortally.

Lung Cancer: Tobacco smoking is responsible for 90% of all lung cancer, 75% of chronic bronchitis and emphysema, and 25% of all cases of ischaemic heart disease. Note how the cancer above has taken over the lower half of the lung in the right photo. Every breath racked with torturous and unbearable pain — irreversible.
